

## **Xaerus Appoints Drivetrain as Australian Distributor**

Xaerus Performance Fluids International is pleased to announce it has appointed Drivetrain Power and Propulsion as the exclusive distributor of Xaerus Performance Fluids International's hydrocarbon compression lubricant products and services in the Australian, New Zealand, and Papua New Guinean markets.

"Xaerus are clearly world leaders in the development and application of lubricants for demanding hydrocarbon compression duties. Including quality compressor lubrication products backed by globally recognized experts adds a significant dimension to Drivetrain's gas compression service and support offering. It is a particularly important enhancement of our growing screw compressor business where proper application of the lubricant is critical for reliable compressor operation" said Mr. David Bentley, Drivetrain General Manager of Power and Compression, during the announcement.

Xaerus lubricants are manufactured in Michigan USA and approved for use by leading compressor Original Equipment Manufacturers (OEM). Drivetrain Power and Propulsion currently holds stock of a selection of Xaerus compressor lubricants and will be adding to this inventory now that a formal distribution agreement is in place.

"Drivetrain's strong gas compression service offering and extensive branch and distribution network means Drivetrain was the standout partner for Xaerus in the Australasian region." Said Mr. Bryan Dole, Xaerus Director of Sales and Technology.
